

Inference	Given	Finds	The beans syllogism		As a triangle
Deduction <i>forced</i> <i>truth-preserving</i>	Rule + Case	Result	g All the beans from this bag are white. f These beans are from this bag. $\therefore h$ These beans are white.		A triangle with vertices A (bottom left, labeled 'these beans'), B (top, labeled 'bag beans'), and C (bottom right, labeled 'white'). A solid arrow labeled 'f' points from A to B. A solid arrow labeled 'g' points from B to C. A dashed arrow labeled 'h' points from A to C.
Induction <i>ampliative</i> <i>finds the rule</i>	Case + Result	Rule	f These beans are from this bag. h These beans are white. $\therefore g$ All the beans from this bag are white.		A triangle with vertices A (bottom left, labeled 'these beans'), B (top, labeled 'bag beans'), and C (bottom right, labeled 'white'). A solid arrow labeled 'f' points from A to B. A dashed blue arrow labeled 'g' points from B to C. A solid arrow labeled 'h' points from A to C.
Abduction <i>ampliative</i> <i>finds the case</i>	Rule + Result	Case	g All the beans from this bag are white. h These beans are white. $\therefore f$ These beans are from this bag.		A triangle with vertices A (bottom left, labeled 'these beans'), B (top, labeled 'bag beans'), and C (bottom right, labeled 'white'). A dashed red arrow labeled 'f' points from A to B. A solid arrow labeled 'g' points from B to C. A solid arrow labeled 'h' points from A to C.
